

## British Association of Paediatric Surgeons Congenital Anomalies Surveillance System (BAPS-CASS)

*The national system to study the surgical management of a range of neonatal conditions*

### Newsletter 18 October 2011

## Hirschsprung's disease One year Follow-up

The BAPS-CASS Hirschsprung's Disease project has been collecting data for 12 months and we have identified over 130 cases of infants diagnosed in the first six months of life. We would like to thank all of you who have contributed so far. We will continue collecting birth and early management data for another 6 months and anticipate identifying a final cohort of over 200 infants.

One of the main aims of this project is to establish the outcomes of infants at one year of age, in order to inform future management and parent counselling. As the first infants in the cohort are now approaching 12 months following their initial diagnosis, we will shortly be sending out short forms to collect the one year data, as each infant reaches this milestone. Gregor Walker, the study lead, in consultation with a number of you, has designed the form to facilitate completion in the out-patient setting, and plans to fill the form out for each of his patients in out-patients when they are approximately 12 months post-diagnosis. Hopefully this should make completion fairly straightforward.

### Case Report Summary to 20/09/10

Condition	Cases Reported	Forms returned	Confirmed Cases	Unconfirmed Cases	Duplicate Cases
Hirschsprung's Disease	134	67 (50)	61 (90)	6 (9)	0
Congenital Diaphragmatic Hernia	261	219 (84)	207 (95)	8 (4)	4 (1)
Congenital Diaphragmatic Hernia 1yr forms	164	101 (62)	101 (100)	0 (0)	0 (0)

## CDH Follow-up:

All the surviving infants in the CDH cohort should have reached one year of age now. We would therefore be grateful if you could complete any outstanding follow-up forms as soon as possible so that we can begin to analyse the data.

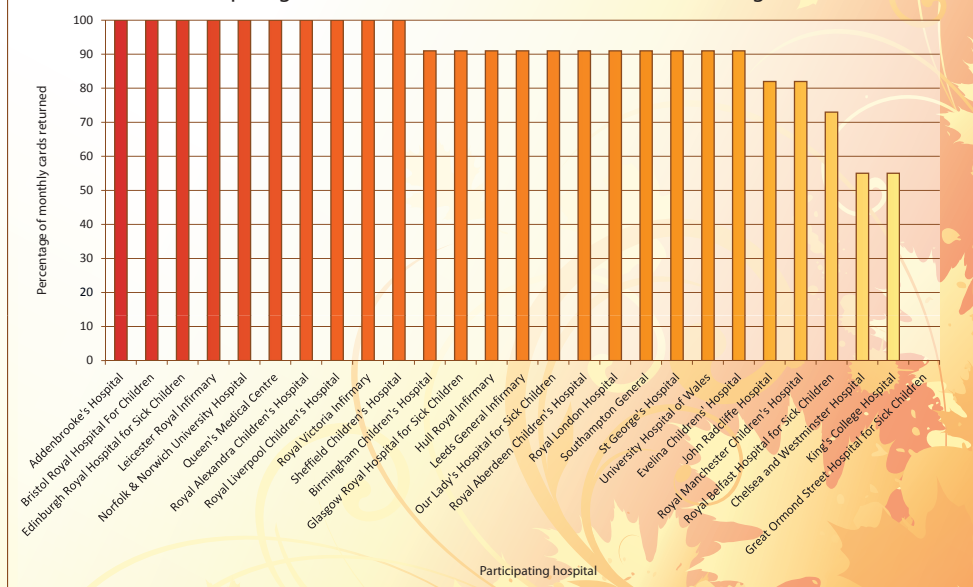

## Star hospitals

Many thanks to the following units who have returned all cards and the majority of forms for the Hirschsprung's Disease study to date:

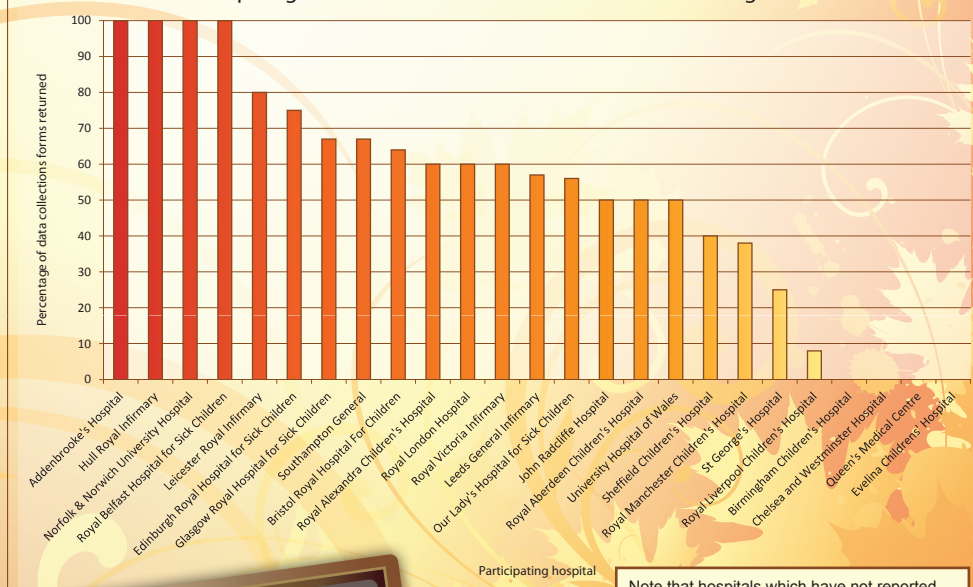

Addenbrooke's Hospital  
 Bristol Royal Hospital For Children  
 Edinburgh Royal Hospital for Sick Children  
 Leicester Royal Infirmary  
 Norfolk & Norwich University Hospital

**Thank you!**

Hirschsprungs Disease - Card return rates October 2010 - August 2011

Hirschsprungs disease form return rates October 2010 - August 2011

Note that hospitals which have not reported any cases do not appear in this chart.

Thank you!  
The BAPS-CASS Team.
