

THE GROWTH ASSESSMENT PROGRAMME

Our personalised growth assessment charts are reducing risk for women and their babies through:

Datix reporting

Learning from RCA errors

Closer working with clinicians

Sharing lessons learned

Continuous education

Updating and sharing of policies

Eliminating 'errors'

We have significantly decreased stillbirth rates

Improved staff confidence and mothers more involved in care

We are consistently ranked in the UK's top 10 GAP users for detection of small for gestational age babies

SAFER PREGNANCY
